RESUME

Objective:

To utilize my experience in Linux system administration and trading operations support to contribute to efficient and reliable IT operations.

Personal Details:

Address	:	Jogeshwari (E), Mumbai Maharastra, PinCode 400060
Date of Birth	:	24 th August 2000
Gender	:	Male
Hobbies	:	Playing Cricket, Listening Music & Watching movies.
Marital Status	:	Single
Nationality	:	Indian
Contact No.	:	9967964569

Aws-Devops skills:

- Setup/Managing Linux Servers on Amazon (EC2, EBS, ELB, SSL, Security Groups, and IAM).
- Setup/Managing VPC, Subnets; make the connection between different zones; Blocking suspicious ip/subnet via ACL.
- Setup/Managing CDN on Amazon CloudFront (Origin Path: Server / S3) to improve site
- Monitoring servers through Amazon CloudWatch.
- Creating/Managing DNS records on Amazon Route 53 and go-daddy panel.
- Creating/Managing AMI/Snapshots/Volumes, Upgrade/downgrade AWS resources (CPU, Memory, EBS).
- Good understanding of containerization and orchestration concepts using AWS services
- Familiar with Amazon ECS, EKS, and AWS Fargate for container-based deployments .
- Knowledge of Kubernetes architecture and basic deployment workflows
- Understanding of container lifecycle, microservices, and cloud-based deployments .

Devops skills:

- knowledge of CI/CD pipelines using Jenkins (job creation, build & deployment automation).
- Hands-on experience with Docker (Dockerfile creation, image building, container management).
- Familiar with Kubernetes (Minikube) for local container orchestration (pods, deployments, services).
- Experience with Git & GitHub (branching, merging, repository management).

Linux Administration skills:

- OS Installation: Installing & configuration of Redhat, Centos, Suse & Ubuntu.
- User Administration: Adding a New User Account, Modifying/Deleting User Account, Locking and Unlocking user accounts.
- LVM: Create/Extend/Reduce the size of logical volume.
- File System Management: Managing partition, Making File System, Format file system using Ext2, Ext3 & Ext4 Mount New file system, Un-mount file system.

- Linux Security Services: FTP, SSH, Telnet, SE-Linux configuration.
- Software Installation Methods: YUM (Server/Client Side Configuration), RPM.
- Job Scheduling: Job scheduling for users using Crontab.
- Configuring a system to provide networking services including Apache, Tomcat, Nginx, redis, Mysql, iis.
- Good Hands On Command (ls, cp, mv, rm, find, chmod, chown, ps, top, kill, df, du, free, apt, yum, /var/log, grep, tail, less, ping, netstat curl, wget, etc).
- knowledge of Redhat.

WORK EXPERIENCE

Designation: Linux /Tec-Ops Engineer

Roles and Responsibility (Tec-Ops Engineer):

- Managed end-to-end operations of YES Securities trading platforms across UAT, CUG, and Production environments..
- Performed application deployments in UAT, CUG, and Prod, including release validation and rollback when required..
- Handled installation, configuration, and upgrading of services across all environments..
- Monitored system performance, application health, and trading activities to ensure high availability and minimal downtime.
- Conducted incident management and root cause analysis (RCA) for critical production issues.
- Managed Linux servers, including service control, log monitoring, and performance tuning.
- Coordinated with security teams to fix vulnerabilities, apply patches, and ensure compliance with security standards.
- Performed database management tasks, including:
- Performed database management tasks, including:
 - ;- Taking database backups (dumps) and restoring when required.
 - ;- Writing and executing SQL queries for data validation and troubleshooting.
- Documented SOPs, deployment processes, and troubleshooting guides.

Roles and Responsibility (Linux Administration):

- Installed and configured Linux and Windows operating systems based on client requirements.
- Executed remote administrative tasks using Console, SSH, and Remote Desktop Protocol (RDP).
- Managing package installation and upgrades using YUM, RPM and source code.
- Monitoring of servers using Manage Engine Application Manager and Putty.
- Implementation and troubleshooting of network services like FTP, SFTP, NTP, Telnet, SSH.
- Installation of Database servers such as MYSQL.
- User Creation, Deletion and Administration on need basis.
- File encryption & decryption using Openssl.
- File system creation and Management on LVM.
- Shell scripting for log transfer, User creation & deletion.
- Scheduled various regular and queue tasks by using crontab
- Transferring files from one system to other using FTP, WinScp, Scp and Rsync.

Personal Information:

Strengths : Positive attitude, good learner, easily adopt new technology.

Hobbies : Playing cricket and listening music.

Declaration:

I hereby declare that all the details furnished above are true to the best of my knowledge and belief. If you given an opportunity to work in your Reputed Company, I will assure you that I will strain myself to enhance the Image of your company further.
