PROFESSIONAL SUMMARY

Linux and application support engineer with 3 years in BFSI/trading, including 1 year doing DevOps on a live trading platform. Work covers deployments, incident handling and RCA across UAT, CUG and Production, using Jenkins, Docker, Kubernetes and Ansible on AWS. Looking for a DevOps / DevSecOps role in fintech or BFSI.

TECHNICAL SKILLS

CI/CD: Jenkins (pipelines, build and deployment automation)

Containers & Orchestration: Docker, Kubernetes (kubeadm); lab setup on AWS ECS, EKS, Fargate

Cloud (AWS): EC2, EBS, ELB, VPC, IAM, CloudWatch, Route 53, Security Groups

IaC & Config Management: Ansible (playbooks, roles); Terraform (basic)

Monitoring: Grafana, Prometheus

Security: SBOM generation, vulnerability and patch management, SELinux, OpenSSL

Version Control: Git, GitHub

OS & Databases: Linux (RHEL, CentOS, Ubuntu), Windows Server 2016, MSSQL, MySQL, Redis

Scripting: Shell scripting, Crontab

PROFESSIONAL EXPERIENCE

Tech-Ops Engineer

Rupeeseed Pvt. Ltd. (Client: YES Securities), Mumbai | 2024 - Present

DevOps

- Run applications on Docker and Kubernetes (kubeadm): deployments, services and troubleshooting.
- Host applications on AWS EC2 and VPC.
- Monitor servers, applications and Kubernetes workloads with Grafana and Prometheus.
- Generate SBOMs for deployed container images and use them to track vulnerabilities.
- Support Jenkins pipelines for build, deploy, validation and rollback across environments.
- Troubleshoot production incidents and do RCA using logs and monitoring data.

Production Support

- Support YES Securities trading platforms in UAT, CUG and Production, including live market hours.
- Deploy releases: pre-release checks, post-deployment verification and rollback when needed.
- Lead incident handling and root cause analysis for critical production issues.
- Work with the security team to fix vulnerabilities and apply patches.
- Take database backups and restores; run SQL queries for data checks.

Linux Administrator

Ideastack Pvt. Ltd., Mumbai | 2023 - 2024

- Installed and administered Linux and Windows servers; remote access via SSH, console and RDP.
- Set up FTP, SFTP, NTP and SSH services and web servers (Apache, Nginx, Tomcat, IIS).
- Wrote shell scripts and Crontab jobs for log transfers, user management and scheduled tasks.
- Managed LVM, Ext3/Ext4 file systems and partitions; configured SELinux and OpenSSL.
- Handled packages with YUM, RPM and APT; transferred files with SCP, Rsync, WinSCP and FTP.

PROJECTS (SELF-MANAGED LAB)

CI/CD Pipeline - Jenkins, Docker, Git

- Built a Jenkins pipeline that pulls code from GitHub, builds a Docker image, pushes it to a registry and deploys to a target server.

Kubernetes Application Deployment - Kubernetes, kubeadm

- Deployed a multi-tier containerised app using Deployments, Services, ConfigMaps and Secrets; troubleshooted CrashLoopBackOff and ImagePullBackOff errors.

CERTIFICATIONS & ACHIEVEMENTS

- Best Support Engineer Award - YES Securities, for production support and incident resolution.
- DevOps & AWS Training Certificate - IT Vedanta.

EDUCATION

- B.Sc. Computer Science - University of Mumbai, Mumbai, India.
