

AKASH GUPTA

DevOps Engineer

Jogeshwar i (E), Mumbai 400060 | 9967964569 | akashgupta97973@gmail.com | [GitHub](#) | [Docker Hub](#)

PROFESSIONAL SUMMARY

Results-driven professional with 3 years of overall experience across Linux Administration, Tech-Ops Engineering, and hands-on DevOps engineering. Background includes 1 year as a Linux Administrator building and managing Linux servers, 2 years as a Tech-Ops Engineer managing UAT, Production, and CUG environments and vulnerabilities for a live trading platform, with 8 months spent concurrently working as a DevOps Engineer managing website deployments with Docker and Kubernetes, building Jenkins CI/CD pipelines, monitoring with Grafana, and working across AWS. Strong Linux foundation combined with practical DevOps tooling experience, seeking to grow further as a full-time DevOps Engineer building scalable, cloud-native solutions.

CORE SKILLS

CI/CD:	Jenkins job creation, build pipelines, deployment automation
Containers:	Docker (Dockerfile, image build, container management), Kubernetes/Minikube (pods, deployments, services), AWS ECS, EKS, Fargate; SBOM generation & management
IaC & Config Mgmt:	Basic Knowledge Terraform, Ansible
AWS Cloud:	EC2, EBS, ELB, VPC, Subnets, IAM, CloudWatch, Route 53, AMI, Security Groups, ACL
Monitoring:	Amazon CloudWatch, Grafana, Prometheus
Version Control:	Git & GitHub branching, merging, pull requests, repository management
OS Administration:	Linux (Ubuntu, RHEL, CentOS, Debian), Windows Server 2016
Databases:	MSSQL, MySQL, Redis
Scripting:	Shell scripting, Crontab-based job scheduling

WORK EXPERIENCE

DevOps Engineer / *Rupeeseed pvt.ltd (Manage Client YES Securities), Mumbai, India*
8 Months (alongside Tech-Ops Engineer role)

- Built and maintained Jenkins CI/CD pipelines for build, test, and deployment automation of trading platform applications.
- Managed containerized workloads using Docker and Kubernetes; deployed and monitored services on AWS on EC2 servers.
- Generated and maintained SBOMs (Software Bill of Materials) for deployed container images to support security compliance and vulnerability tracking.
- Automated infrastructure provisioning and configuration management using Terraform and Ansible.
- Set up monitoring and observability dashboards using Amazon CloudWatch, Grafana, and Prometheus.
- Managed Git/GitHub workflows branching strategy, pull requests, and repository management for DevOps automation scripts.

Tech-Ops Engineer / *Rupeeseed pvt.ltd (Manage Client YES Securities), Mumbai, India*
2 Years

- Managed end-to-end operations of YES Securities trading platforms across UAT, CUG, and Production environments.
- Performed application deployments including release validation and rollback procedures when required.
- Conducted incident management and root cause analysis (RCA) for critical production issues, minimizing downtime.
- Monitored system performance, application health, and trading activities to ensure high availability.
- Coordinated with security teams to fix vulnerabilities, apply patches, and ensure compliance with security standards.
- Performed database management tasks: backups/restores and SQL queries for data validation and troubleshooting.

Linux Administrator / *Ideastack pvt.ltd, Mumbai, India*
1 Year

- Installed and configured Linux/Windows servers; handled remote administration via SSH, Console, and RDP.
- Managed network services (FTP, SFTP, NTP, SSH, Telnet) and web servers (Apache, Nginx, Tomcat, IIS).
- Wrote shell scripts for log transfers, user creation/deletion, and scheduled tasks using Crontab.
- Managed LVM (create/extend/reduce logical volumes), Ext3/Ext4 file systems, partitioning, and mounts.
- Performed user and security administration: user creation/modification/locking, SELinux configuration, OpenSSL file encryption/decryption.

- Handled package management using YUM, RPM, and APT; installed software from source.
- Transferred files across systems using FTP, WinSCP, SCP, and Rsync.
- Documented SOPs, deployment processes, and troubleshooting guides for operational reference.

PROJECTS

YES Securities Trading Application Management

- Managed end-to-end IT operations, application infrastructure deployment, and system reliability for the core YES Securities trading platform across UAT, CUG, and Production environments with a focus on high availability, performance tuning, and security compliance for a high-volume live trading system.
- Containerized and deployed supporting services using Docker/Kubernetes; automated provisioning with Ansible built Jenkins pipelines for CI/CD.

PERSONAL DETAILS

Date of Birth: 24 August 2000 | Nationality: Indian | Marital Status: Single
Strengths: Positive attitude, quick learner, easily adapts to new technologies
