Summary

Senior Software Engineer with 3+ years designing scalable backend systems and leading system design discussions in Python and FastAPI within Agile/Scrum environments. Shipped 10+ production REST APIs, reduced system coupling by 60% through microservices decomposition, and accelerated pipeline throughput by 70% using Kafka and Celery. Deep Python expertise including AsyncIO, OOP, and data processing pipelines. Deployed LLM-powered automation (Llama 3.1/3.2, RAG) and computer vision models with 90%+ accuracy. Actively uses Claude Code for AI-assisted development.

Technical Skills

- **Languages:** Python (AsyncIO, OOP), JavaScript, TypeScript, SQL
- **Frameworks & Architecture:** FastAPI, Flask, Node.js, React, Redux, Microservices, REST API Design, Swagger/OpenAPI
- **Databases:** MySQL, PostgreSQL, Redis
- **Data & Messaging:** Apache Kafka, Celery, ETL, Data Processing, WebSockets, Async Processing
- **Cloud & DevOps:** Docker, AWS (SES, EC2), Azure Functions, CI/CD, Git, Linux
- **Testing & Methodology:** pytest, Unit Testing, Integration Testing, Code Review, Agile, Scrum
- **AI & LLM:** LLM Integration, Generative AI, RAG, Prompt Engineering, Claude Code, YOLOv8, Computer Vision (OpenCV), Llama 3.1/3.2

Work Experience

- | | | |
|------------------------------|--------------------------------------|-------------------|
| Sr. Software Engineer | Openspace Services Pvt. Ltd., Mumbai | 05/2023 – Present |
|------------------------------|--------------------------------------|-------------------|
- Architected and deployed 10+ RESTful APIs using FastAPI and Node.js with Swagger/OpenAPI documentation, reducing average response time by 40% for enterprise-scale workloads.
 - Integrated Llama 3.1/3.2 LLMs to automate document analysis and data extraction, eliminating 15+ hours of manual processing per week across client workflows.
 - Led system design and decomposed a monolithic system into 8 independent microservices, cutting inter-service coupling by 60% and tripling deployment frequency.
 - Designed a Celery and Redis task queue handling 5,000+ concurrent background jobs with zero performance degradation at scale.
 - Implemented CI/CD pipelines with Docker and Git, cutting deployment time by 50% and enabling zero-downtime production releases.
 - Conducted code reviews and mentored junior engineers on backend best practices within an Agile Scrum team, improving delivery quality and sprint velocity.

Projects

- | | |
|---|---------------------------------------|
| Complygini Employee Compliance Register Automation | <i>Python, FastAPI, Kafka, Celery</i> |
|---|---------------------------------------|
- Generated statutory compliance registers for 20+ organizations, cutting manual HR effort by 80% with 100% regulatory accuracy via parameterized PDF/Excel report APIs.
 - Built async ETL pipelines with Kafka and Celery for parallel employee dataset processing, reducing end-to-end job time by 70%.
- | | |
|--|-----------------------------------|
| MyHealth Meter Enterprise Health Analytics Platform | <i>FastAPI, React, Kafka, AWS</i> |
|--|-----------------------------------|
- Built a distributed microservices platform managing 5,000+ employee health records daily with 99.9% uptime; improved database query speed by 65% through OOP-driven query optimization.
 - Engineered a multi-channel notification system (WhatsApp, AWS SES, Kafka) delivering 10,000+ health alerts per day with guaranteed message delivery.
- | | |
|--|-------------------------------|
| Intelligent Document Masking AI-Driven PII Security | <i>YOLOv8, OpenCV, Python</i> |
|--|-------------------------------|
- Trained YOLOv8 and OpenCV models for document classification with 90%+ accuracy; scalable pipeline processes 100+ files per minute.
 - Designed a multi-model architecture to classify, extract, mask, and store PII data for 3+ enterprise clients meeting data protection compliance standards.

Education

- | | |
|---|--------------|
| M.L Dahanukar College, Mumbai, India | CGPA: 7.3/10 |
| Bachelor of Science in Information Technology | 2018–2021 |
