

Akash Gupta

📍 Jogeshwari (E), Mumbai 400060 | Mob: 9967964569 | Email: akashgupta97973@gmail.com

Summary

Results-driven professional with 2.8 years of hands-on experience in technical operations and infrastructure, split between Linux Administration (1 year) and Tech-Ops Engineering (1.8 years). Proven track record managing Application trading platform operations. Passionate about automation and system reliability, I am looking to transition into a DevOps Engineer role where I can leverage my deep Linux foundation and hands-on knowledge of DevOps tooling to build scalable cloud-native solutions

Skills

- **Version Control (Git & GitHub):** — branching, merging, pull requests, repository management
- **AWS Core:** EC2, EBS, ELB, VPC, Subnets, IAM, CloudWatch, Route 53, AMI Security Groups, ACL
- **Containers & Orchestration:** — Docker (Dockerfile, image build, container management), Kubernetes/Minikube (pods, deployments, services) AWS ECS, EKS, Fargate.
- **Databases:** MSSQL, MySQL, Redis
- **CI/CD (Jenkins):** — job creation, build pipelines, and deployment automation
- **Monitoring:** — Amazon Cloud Watch, Grafana, Prometheus.
- **Operating System:** LINUX(ubuntu, redhat, centos, debian) Windows 2016
- **IaC and Configuration Management:** Automated infrastructure and deployment using Terraform and Ansible.

WORK EXPERIENCE

Linux / Tec-Ops Engineer

/ YES Securities / Mumbai, India

Roles: Linux Administration & Trading Operations Support

- Managed end-to-end operations of YES Securities trading platforms across UAT, CUG, and Production environments.
- Performed application deployments including release validation and rollback procedures when required.
- Conducted incident management and root cause analysis (RCA) for critical production issues, minimizing downtime.
- Monitored system performance, application health, and trading activities to ensure high availability.
- Coordinated with security teams to fix vulnerabilities, apply patches, and ensure compliance with security standards.
- Performed database management tasks: backups/restores and SQL queries for data validation and troubleshooting
- Installed and configured Linux/Windows servers; handled remote admin tasks via SSH, Console, and RDP
- Managed network services (FTP, SFTP, NTP, SSH, Telnet) and web servers (Apache, Nginx, Tomcat, IIS)
- Wrote shell scripts for log transfers, user creation/deletion, and scheduled tasks using Crontab
- Transferred files across systems using FTP, WinSCP, SCP, and Rsync; managed LVM and file system operations.
- Documented SOPs, deployment processes, and troubleshooting guides for operational reference.

LINUX ADMINISTRATION SKILLS

Operating Systems: RHEL, CentOS, SUSE, Ubuntu — installation, configuration, and ongoing administration

User & Security Admin: User creation/modification/deletion/locking SELinux config; OpenSSL file encryption & decryption

Storage & File Systems: LVM (create/extend/reduce logical volumes), Ext3/Ext4, partition and mount management

Package Management: YUM (server/client config), RPM, apt; software installation from source code.

Networking & Services: FTP, SSH, Telnet, NTP, Apache, Tomcat, Nginx, Redis, MySQL, IIS.

Scripting & Automation: Shell scripting for log transfers, user admin tasks; Crontab-based job scheduling

Key Commands: ls, cp, mv, rm, find, chmod, chown, ps, top, kill, df, du, free, grep, tail, less, ping, netstat, curl, wget

PERSONAL DETAILS

Date of Birth: 24 August 2000

Gender: Male Nationality: Indian

Marital Status: Single

Hobbies: Playing Cricket, Listening to Music, Watching Movies

Strengths: Positive attitude, quick learner, easily adapts to new technologies

Projects

YES Securities Trading Application Management

Managed the end-to-end IT operations, application infrastructure deployment, and system reliability for the core YES Securities trading platform across UAT, CUG, and Production environments. Focused on ensuring high availability, performance tuning and strict security compliance for a high-volume live trading system
