

TRADESMART ONLINE

Making trading easier, faster, hassle-free, and more profitable

PRODUCT

We provide end-to-end solutions for online stock trading in Indian capital markets through innovative software and reliable support services.

WHY US?

At Tradesmart, we are on a mission to make trading more accessible and affordable by digitizing traditional processes. We build tools, services, and platforms that minimize manual intervention and drive efficient, scalable trading experiences.

Our tech-driven approach emphasizes automation, innovation, and productivity, empowering our team to contribute meaningfully toward building cutting-edge trading solutions.

Position: Junior DevOps / System Engineer

Experience: 2+ Years

Location: Mumbai (Candidates from nearby areas preferred)

Core Responsibilities:

- Support and maintain Linux-based systems in both cloud (AWS/GCP) and on-premise environments
 - Assist in setting up development tools and infrastructure
 - Help improve deployment and release processes through automation
 - Basic server management and monitoring (hardware, servers, system resources, etc.)
 - Manage backups, patching, and upgrades under senior guidance
 - Troubleshoot systems and applications across platforms
 - Support in writing scripts (bash/shell) for routine tasks like cron jobs
 - Assist in deployments and CI/CD setup (Jenkins, Docker, etc.)
 - Maintain good documentation of systems and processes
 - Provide hardware & networking support when needed
 - Participate in internal trainings to learn new tools and technologies
-

Key Skills Required:

- 2+ years of experience in **Linux system administration or Hardware Networking**
 - Basic knowledge of **networking and hardware troubleshooting**
 - Hands-on experience with **Ubuntu/RHEL, Apache/Nginx, and MySQL**
 - Exposure to **cloud platforms** like AWS or GCP (basic experience acceptable)
 - Familiarity with tools like **Docker, Ansible, Jenkins, and Terraform** is a plus
 - Comfortable with **basic scripting** (bash/shell)
 - Knowledge of server monitoring tools like **Nagios, Zabbix** (added advantage)
 - Basic understanding of Windows servers and Active Directory preferred
 - Good communication and documentation skills
-

Why Apply?

- Office close to Metro Station
 - Friendly and tech-savvy work environment
 - Opportunity to learn modern DevOps tools and practices
 - Growth potential in cloud and automation technologies
-
