PROFESSIONAL EXPERIENCE

Tech-Ops Engineer

Rupeeseed Pvt. Ltd. (Client: YES Securities) | Mumbai, India | 2024 - Present

DevOps & Automation

- Built and maintained Jenkins CI/CD pipelines for build, test, and deployment automation of trading platform applications.
- Containerized and deployed supporting services using Docker and Kubernetes; managed images, deployments, and service exposure.
- Automated server configuration and operational tasks using Ansible playbooks across UAT, CUG, and Production.
- Generated and maintained SBOMs for deployed container images to support security compliance and vulnerability tracking.
- Set up monitoring dashboards and alerts using CloudWatch, Grafana, and Prometheus for proactive issue detection.
- Managed Git/GitHub branching strategy, pull requests, and repositories for automation scripts.

Production Support & Operations

- Managed end-to-end operations of YES Securities trading platforms across UAT, CUG, and Production, ensuring high availability during live market hours.
- Performed application deployments including pre-release validation, post-deployment verification, and rollback procedures.
- Led incident management and root cause analysis (RCA) for critical production issues, minimising downtime.
- Coordinated with security teams to remediate vulnerabilities, apply patches, and maintain compliance.
- Handled database backups, restores, and SQL queries for data validation and troubleshooting.

Linux Administrator

Ideastack Pvt. Ltd. | Mumbai, India | 2023 - 2024

- Installed, configured, and administered Linux/Windows servers; remote administration via SSH, console, and RDP.
- Managed network services (FTP, SFTP, NTP, SSH) and web servers (Apache, Nginx, Tomcat, IIS).
- Wrote shell scripts for log transfers, user management, and scheduled tasks using Crontab.
- Managed LVM, Ext3/Ext4 file systems and partitions; performed security administration including SELinux and OpenSSL.
- Handled package management (YUM, RPM, APT); transferred files using SCP, Rsync, WinSCP, and FTP.

PROJECTS (SELF-MANAGED LAB)

CI/CD Pipeline Automation - Jenkins, Docker, Git

- Built an end-to-end Jenkins pipeline: pulls source from GitHub, builds a Docker image, pushes to a registry, deploys to a target server.

Kubernetes Application Deployment - Kubernetes, Minikube

- Deployed a multi-tier containerised app using Deployments, Services, ConfigMaps, and Secrets; troubleshooted CrashLoopBackOff/ImagePullBackOff.

Infrastructure Automation - Ansible, AWS

- Provisioned AWS EC2 instances and automated post-provisioning setup using Ansible playbooks and roles.

CERTIFICATIONS & ACHIEVEMENTS

- DevOps & AWS Training Certificate - IT Vedanta.
- Best Support Engineer Award - YES Securities, for excellence in production support, incident resolution, and application stability.
