

AKASH GUPTA

Cloud & DevOps Engineer

Jogeshwari (E), Mumbai • 9967964569 • akashgupta97973@gmail.com

PROFESSIONAL SUMMARY

Application Support / DevOps professional with 3 years of overall experience spanning Linux administration, production support for a live trading platform, and hands-on DevOps engineering. Skilled in building CI/CD pipelines with Jenkins, containerizing and deploying frontend and backend applications with Docker and Kubernetes, and managing AWS infrastructure including EC2, VPC, IAM, EBS, ELB, Route 53, and CloudWatch. Experienced with Infrastructure as Code (Terraform, Ansible), Git/GitHub version control, and DevSecOps practices such as SBOM generation for container security and compliance. Strong track record in incident management, root cause analysis, and production troubleshooting for high-availability systems. Transitioning strong Linux and Application Support foundations into a full-time Cloud / DevOps Engineer role.

TECHNICAL SKILLS

Cloud (AWS): EC2, VPC, IAM, EBS, ELB, Route 53, CloudWatch, AMI, Security Groups, Subnets, ACL

Containers & Orchestration: Docker (image build, Dockerfile, container management), Kubernetes / Minikube (pods, deployments, services), AWS ECS, EKS, Fargate

CI/CD & Version Control: Jenkins (pipeline & job creation), Git & GitHub (branching, merging, pull requests, repository management)

Infrastructure as Code: Terraform (Resource Provisioning, Modules), Ansible (Playbooks, Automation)

DevSecOps & Security: SBOM generation & management, vulnerability tracking, patching & compliance coordination, SELinux, OpenSSL

Monitoring & Observability: Amazon CloudWatch, Grafana, Prometheus

OS, Web & Networking: Linux (Ubuntu, RHEL, CentOS, Debian), Windows Server 2016, Nginx, Apache, Tomcat, IIS, FTP/SFTP/SSH/NTP

Scripting & Databases: Shell scripting, Crontab job scheduling, MSSQL, MySQL, Redis

WORK EXPERIENCE

DevOps Engineer | Rupeeseed Pvt. Ltd. (Client: YES Securities)

Mumbai, India

- Built and maintained Jenkins CI/CD pipelines to automate build, test, and deployment of trading platform applications.
- Containerized and deployed frontend and backend services using Docker and Kubernetes; deployed and monitored workloads on AWS EC2.
- Generated and maintained Software Bill of Materials (SBOM) for deployed container images to support security compliance and vulnerability tracking.
- Automated infrastructure provisioning and configuration management using Terraform and Ansible.
- Managed Git/GitHub workflows including branching strategy, pull requests, and repository management for DevOps automation scripts.

Tech-Ops Engineer | Rupeeseed Pvt. Ltd. (Client: YES Securities)

Mumbai, India

- Managed end-to-end operations of the YES Securities trading platform across UAT, CUG, and Production environments.
- Executed application deployments, including release validation and rollback procedures, to maintain deployment reliability.
- Led incident management and root cause analysis (RCA) for critical production issues, working to minimize downtime.
- Monitored system performance, application health, and trading activity to help ensure high availability.
- Coordinated with security teams to remediate vulnerabilities, apply patches, and maintain compliance with security standards.
- Performed database management tasks including backups/restores and SQL queries for data validation and troubleshooting.

Linux Administrator | Ideastack Pvt. Ltd.

Mumbai, India

- Installed and configured Linux/Windows servers; performed remote administration via SSH, console, and RDP.
- Managed network services (FTP, SFTP, NTP, SSH, Telnet) and web servers (Apache, Nginx, Tomcat, IIS).
- Wrote shell scripts for log transfers, user creation/deletion, and scheduled tasks using Crontab.
- Managed LVM (create/extend/reduce logical volumes), Ext3/Ext4 file systems, partitioning, and mounts.
- Performed user and security administration: account management, SELinux configuration, and OpenSSL file encryption/decryption.
- Handled package management using YUM, RPM, and APT; installed software from source.
- Transferred files across systems using FTP, WinSCP, SCP, and Rsync.
- Documented SOPs, deployment processes, and troubleshooting guides for operational reference.

PROJECTS

YES Securities Trading Application Management

- Managed end-to-end IT operations, application infrastructure deployment, and system reliability for a core live trading platform across UAT, CUG, and Production environments, with a focus on high availability, performance, and security compliance.
- Containerized and deployed supporting services using Docker/Kubernetes; automated provisioning with Ansible and built Jenkins pipelines for CI/CD.

CERTIFICATIONS

DevOps / Cloud Certification — IT Vedant

07/2026

AWARDS

Best Support Engineer Award — Yash Securities

08/2026

Recognized for excellence in production support, incident resolution, and application stability.
